Dear All,

Bulletin 2007/3

### **Goodyear**

We would like to bring it to your attention that you place your order for your tyres for the East London race 2 weeks in advance of day of the race. Please note that Goodyear **will not** be at the East London track so **please ensure** that you have had your tyres fitted when you collect them. Rui Campos is in the process of arranging for local assistance at the track for changing rain tyres if necessary. We will keep you updated.

### **Tyres**

Please note that all **practice tyres** will be marked old or new (if your tyres are from Wesbank and A1 they already in the system and you may use them for practice as they already in the system– any other tyre not yet marked for 2007 will be marked and count as part of your 2007 allocation. Please read your tyre rule so that there will be no confusion at the track.

### **19-tooth Pinion**

We bring it to your attention that we must use the 19-tooth pinion gear at East London - it is part of our rules. Please ensure that you change from 18-tooth to 19-tooth.

Yours in Racing

Colin Frost  
Technical Chairman

EXECULINE
